### A POSITIVE CURE

ALLAING SOLUBLE MEDICINE. WITHOUT MERCURY. CURED October 16, 1881. One box cured me of my disease. I was suffering from a disease of the blood, and had been treated by all the best physicians in the city, but without success. I had lost my hair, and my skin was covered with sores. I was unable to work, and I was in great pain. I had been told that I would never be cured, but I had heard of this medicine, and I decided to try it. I bought a box of it, and I took it according to the directions. I was cured in ten days. I am now well, and I am able to work again. I am very grateful to you for the cure. I have written this letter to let you know that I am cured, and to let you know that your medicine is a positive cure for this disease. I have written this letter to let you know that I am cured, and to let you know that your medicine is a positive cure for this disease. I have written this letter to let you know that I am cured, and to let you know that your medicine is a positive cure for this disease.

### NERVE AND BRAIN DISEASES

DR. R. C. WEST'S NERVE AND BRAIN TREATMENT, a specific for Hysteria, Dizziness, Convulsions, Nervous Headache, Mental Depression, Loss of Memory, Premature Old Age, caused by over-exertion, over-indulgence, excesses or overwork of the brain which leads to Paralysis, decay and death. One box will cure recent cases. Each box contains one month's treatment. One dollar a box, or six boxes for five dollars; sent by mail prepaid on receipt of price. We guarantee six boxes to cure any case. With each order received by us for six boxes, accompanied with five dollars, we will send the purchaser our written guarantee to return the money if the treatment does not effect a cure. Warrant issued only by Z. C. M. I. Drug Co., Salt Lake City, Utah. Orders by mail.

### LATEST TELEGRAMS.

#### XLVII CONGRES.

#### REGULAR SESSION.

#### SENATE.

Washington, 27.—Vest moved to recommit to the committee on territories the bill for the admission of Dakota.

The bill passed granting a pension to the widows of Presidents Garfield, Tyler and Polk.

The tariff commission bill, coming up, Vanwick and Anthony advocated a commission of Congressmen, while Brown favored them on a civilian commission.

The agricultural appropriation bill with amendments was reported back.

The amendments reduce the amounts for experiments in sorghum and beet sugar; for the extirpation of locusts and for agricultural data. A few items are slightly increased. Adjourned.

#### HOUSE.

Washington, 27.—Williams, of Wisconsin, offered a resolution requesting the President to inform the House whether any protocol had been signed by Trevelock or any other diplomatic representative of the United States, setting forth terms for ending the war in South America, and if so, to furnish the House a copy of the same, and also with copies of the correspondence relating thereto, not already communicated to one of the Houses of Congress. Adopted.

Caswell reported back the post-office appropriation bill. Referred to committee of the whole.

Petitions were presented asking the passage of the Lowell bill.

A bill was introduced by Haskell, authorizing the department of justice to audit the claims of medical experts at the Giteau trial, allowing not over twenty-five dollars per day for each. Referred.

By King, for a joint committee of five senators and ten representatives to investigate the floods in the Mississippi Valley, and report what preventive measures are necessary.

Bayne of Pennsylvania, introduced a joint resolution requesting the President to take such steps as are necessary to secure the negotiation of an additional treaty between the United States and Great Britain, which will provide for the extradition of such fugitive criminals as may be charged with serious crimes or felonies, or who may have escaped before the execution or completion of their sentences, and who are not extraditable under the existing treaty referred.

By Phelps, to establish the department of industry, the head of which shall be a cabinet officer. It provides for a bureau of agriculture, fishery, mining, manufactures, commerce, statistics and education. The head of each bureau will be known by the title of "commissioner" appointed by the President by and with the consent of the Senate.

By Thomas, appropriating \$861,000 for the improvement of the Mississippi River and for continuing the work already begun, in accordance with the recommendation of the Mississippi River commission.

By Harris, to provide for an assistant secretary of the navy, to be selected from the officers of the navy under the rank of rear admiral, and to receive highest rate of pay of his grade, and perform the duties of the secretary of the navy in the absence of that officer.

By McCook, to restore and fix the inspector-general's department of the army.

The secretary of the interior, in response to a resolution calling for an estimate of the amount required to pay off pensions of survivors of the Mexican and Indian wars, prior to 1845, estimated that \$65,380,480 would be required to pay the Mexican war pensions, and \$28,201,632 to pay the pensions of Indian wars; aggregate, \$93,582,112.

Some bills relating to the District of Columbia were passed and the bill incorporating the Garfield memorial hospital was taken up.

Neal, of Ohio, explained that the purpose of the bill was to make the corporation perpetual.

Cobb, of Indiana, predicted that if the bill should pass the government of the United States would be called upon to erect the building and maintain the institution.

Humphrey, of Wisconsin, thought the incorporators should have recourse to the general incorporation law for the accomplishment of their purpose.

Blount, of Georgia, said some of the incorporators, under cover of the name of Garfield, and pretending to seek to create a memorial to him, came here asking to accomplish by that means what they had failed to accomplish heretofore upon its merits. It was a mockery of the name of Garfield for them to come in here with this old measure, and he trusted the House would repudiate the spirit which had been shown.

Wilson, of West Virginia, offered an amendment, providing that whenever the corporation shall apply to Congress for aid to any appropriation made for that purpose, shall operate as a repeal of this act.

Pending action, the bill and amendments were, on motion of Holmes, of Indiana, recommitted with instructions to the committee to report an amendment to the general incorporation law of the District of Columbia, by means of which the hospital can be incorporated and be perpetual. Under the present law no association can be incorporated for a longer period than twenty years. Adjourned.

#### Foreign.

London, 27.—The Times comments on the completion of American monitors, says: America owes it to her honor and greatness to possess a fleet which shall be more than a phantom.

Thomas & Oxley, merchants, London and Liverpool, failed; liabilities \$75,000.

In the Commons, this evening, Gladstone said the liberation, on parole, of some of the suspects to attend to private business, forms no precedent for liberating Parnell, Dillon and O'Kelly, that they may participate in a division upon the closure. Thirty-three home rulers promise to oppose the closure.

St. Petersburg, 27.—The object of fixing the coronation of the Czar for late date is to permit the exhibition at Moscow, which will open in May, to be closed before the occurrence. It is thought if the two events be simultaneous, the great concourse of people attending the exhibition would give an opportunity to nihilists, who are concentrating their energies in Moscow. A scheme is under consideration of enrolling a number of inhabitants to act as special constables during the coronation.

Paris, 27.—The Chamber of Deputies voted urgency for the ministerial bill revoking the prohibition against the importation of American pork.

Tirard, minister of commerce, said that government was obliged to rescind the prohibition on account of the difficulty of selecting any of the complicated measures for inspections. American packers would take greater precautions when they knew their goods would be more minutely examined. The debate adjourned.

#### A Confession.

Kansas City, 27.—John Laird, of the indicted Blue Cut train robbers, made a confession this afternoon, at Independence. He says that seven boys were with the old gang, which was headed by a man he supposed to have been Jesse James; that it was the members of the old gang who entered the express car and went through the train, and that all the country boys did was to keep up the racket on the outside. After the robbery the entire party went into the woods a short distance where the leaders, who had all the "swag" in their possession, said to the boys: "Boys, we haven't got time to divide; they are too hot after us, and we didn't get the money we expected anyhow; but we will all meet on the right fork of the Blue next Wednesday night, just one week from the night of the robbery." With that all of the old gang mounted and rode away with all the booty in their possession, while Laird and his comrades dispersed for their homes no richer than when they started. Before the night arrived which had been set for the divide, most of them were safely jailed and others were fleeing the country as rapidly as possible. He declares his belief that the robbery was a put up job, deliberately planned by James and his gang for the double purpose of securing the plunder and getting the country boys into trouble in order to divert the attention of the authorities from their own actions.

#### Pacific Coast Patents.

Washington, 27.—The following patents were issued to Pacific Coast inventors last week: Ambrose Blatchley, San Francisco, desulphurizing furnace; Dan Donnelly, Sutter Creek, California, water-wheel; John Powers, San Francisco, clearing slots of wire rope railways; Lewis A. Reister, Chico, California, side saddle; Edward T. Rix, San Francisco, hose coupling; Richard E. Williams, Grass Valley, California, condenser for steam engines; William Schenker, Denver, Colorado, spring bolt; Samuel Levy, Denver, preparation of yeast.

#### Lampson's Case.

London, 27.—Dr. Lampson's solicitor writes that a large and influential meeting of Americans was held at Exeter Hall to take action in behalf of the prisoner. Many affidavits were read and much verbal evidence given as to the doctor's insanity given. A resolution was unanimously adopted requesting the United States minister to urge a reprieve on the sole ground of insanity, the proofs of which were considered very strong and convincing.

#### Suicide.

Council Bluffs, 26.—George Hailer, an old citizen, while drunk and despondent, yesterday cut an artery in his arm, and bled to death. He leaves a wife and sixteen children.

### WASHINGTON.

#### The Daily Budget from the Capital.

Washington, 27.—Colonel G. H. Mendell's final report upon his project to protect the navigable waters of California against the effects of hydraulic mining, has been printed with unusual promptness and advance copies were received by the House committee on commerce today, in accordance with an arrangement made by Chairman Page, who intends to bring the subject up for consideration at the earliest possible period, with a view to having an appropriation for this purpose inserted in the annual river and harbor bill. Page is confident that the committee will act upon the proposition favorably and that an adequate appropriation for beginning the work will be provided by Congress during the present session.

Investigation into the opium smuggling operations recently detected in San Francisco, develops a scandalous conspiracy to defraud government on the part of certain city and federal officers. The conspiracy was revealed through correspondence conducted in the Chinese language, just produced as evidence.

The Senate public lands committee, today, reported back Senator Farley's bill to give the state of California lands in lieu of the lands for school sections found to be useless for that purpose, and recommended its passage with some slight amendments. The bill, as reported, was placed on the calendar for future action. It provides that the act shall be construed as giving to the state of California the right to select for school purposes other lands in lieu of such sixteenth and thirty-sixth sections as may have been, or shall be found to be mineral lands, provided that such indemnity selections shall be made from the surveyed public lands of the United States in the state of California, subject to entry under the general laws, and not mineral nor occupied by actual settlers, nor reserved for any purpose nor appropriated under any law of the United States. An accompanying written report, submitted by Paddock in behalf of the committee, says: There can be no objection to granting the state of California the right to select and obtain the title to agricultural lands in lieu of the sixteenth and thirty-sixth sections, when the same are mineral. The general land office endorses the main features of the bill, and to meet the suggestions of that office, an amended bill is recommended as a substitute for the original measure. The land commissioner advised that the land should be taken at single minimum rates, but the committee have not agreed with this suggestion and provide that any agricultural land may be taken.

Representative George's bill for the payment of \$70,000 to the state of Oregon for Modoc war expenses, and Berry's bill for the payment of \$4,441 of similar California claims, were favorably reported to the House from the military committee today and placed on the calendar.

The duplicate bills introduced in the Senate by Grover and Farley, were reached on the calendar of that body this afternoon, and passed unanimously.

The House committee for military affairs have unanimously endorsed Representative George's bills to appropriate \$30,000 for the construction of a military road from Scottsburg to Fort Klamath, and \$8,500 for a military road from Portland to Vancouver, and have turned them over to the committee on appropriations with this recommendation as a basis for inserting the items desired in the appropriation bill.

An order was obtained by Butler, today, to take from the Senate files and refer to the military committee the petition of Mrs. Jessie Benton Fremont, claiming a restitution of a part of Point San Jose, military reservation, which she alleges belongs to her, and has been illegally held by the United States government ever since October, 1863. This petition was originally presented to the Senate in 1863 and referred, with a number of similar claims to parts of Black Point reservation, to a court of claims. It has several times been favorably reported from committees, but never reached final action.

Rumors that President Arthur intends to veto the Chinese bill, are extensively circulated and find some believers, but all the members of the Pacific Coast delegation continue to feel cheerfully confident that he will, on no account, fail to sign it.

The Star this evening says: The rumor published in many papers positively asserting that, on account of the passage of the anti-Chinese bill by Congress, the Chinese minister would remove the legation to Madrid is untrue. He was originally accredited to Spain as well as to this country, and he will go there this spring, but his wife will remain here until he returns and so will certain gentlemen of the legation. It will be remembered that the former Chinese minister, Chin Lau Pin, after remaining here a few months went to Spain to present his credentials, and then returned to Washington to live.
